1. GAME OVERVIEW & LORE STORYLINE

In the humid heat of Metro Manila, an ancient subterranean anomaly known as '**Ang Lason ng Lupa**' (*The Earth's Poison*) ruptures beneath Quiapo Church during a catastrophic typhoon season. The cursed miasma transforms infected civilians into ravenous, mutated monsters reflecting ancient Filipino folklore horrors.

With Metro Manila designated as a locked-down 'Red Zone', radio broadcasts transmit a final message: **An armored military extraction unit is stationed at the foot of Mount Mayon in Albay.** Four survivors must combine their abilities to fight across flooded urban streets, dark provincial highways, and ancient rainforests to reach the escape chopper before the island is firebombed.
